

# Low Response Score (LRS) by Census Tract

According to the Census Bureau, you should interpret the LRS as a percentage of households predicted to NOT self-respond to the Decennial Census. The HIGHER the LRS, the MORE DIFFICULT to survey. For more information, please visit the Census Response Outreach Area Mapper (ROAM) <https://www.census.gov/roam> or the 2020 Census Tempe Data Story Map <https://arcg.is/0X4qjj>
